

Phone & Android guide Bottom tabs · hamburger · More Touch-first full walkthrough.

Fully detailed guide for new owners and staff: **what each control is for, what happens when you click, and which screen comes next.** Large uncropped screenshots with orange highlights. Support: support@codearc.co.in.

Audience

New restaurant clients & staff

Support

support@codearc.co.in

Live site

restrosuite.codearc.co.in

How to use this guide

1. **One step per page** — large screenshot of the real product, with the important button outlined in orange.
2. **Read the goal** — why this screen exists.
3. **Follow the numbered actions** on a computer, tablet, or phone browser (or Android / Windows app).
4. **Do not skip Settings tax + Menu GST** before live sales.
5. **Stuck?** Email support@codearc.co.in with your Outlet ID and the step number (e.g. Step 10).

Demo login used for screenshots

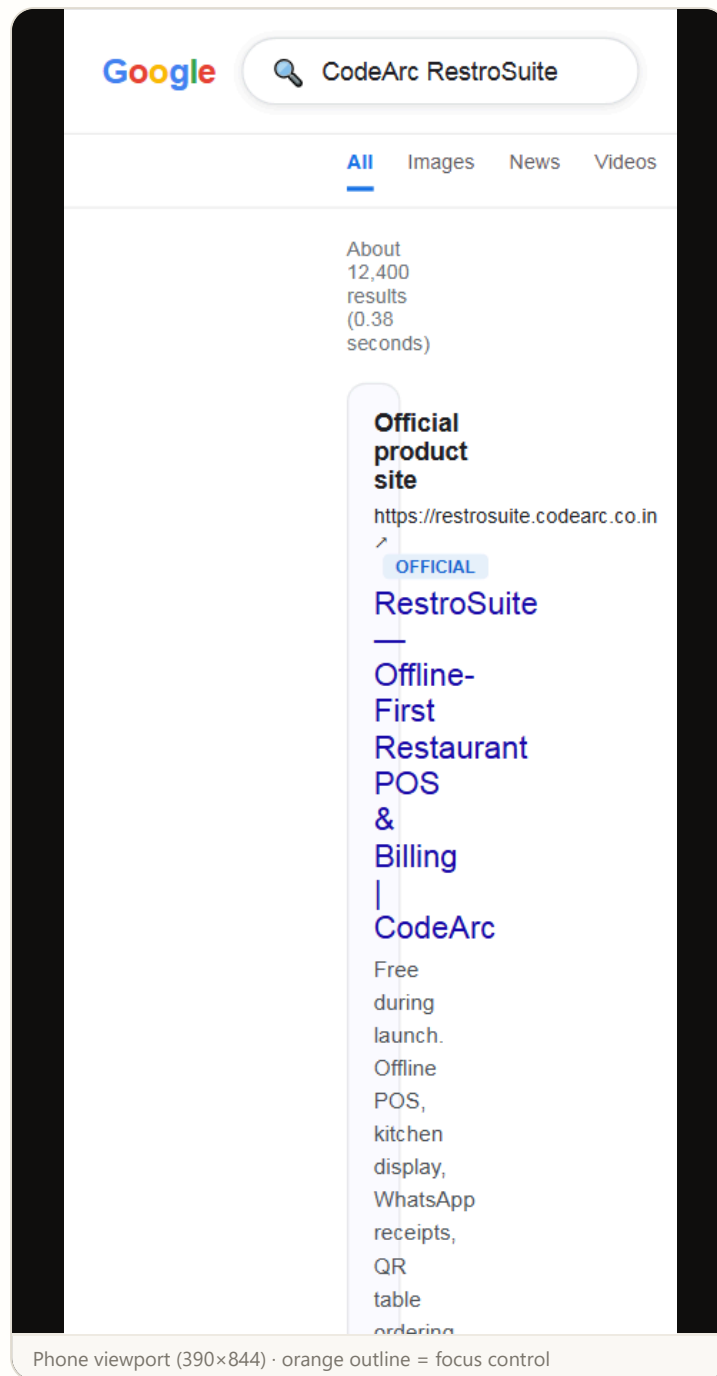

Outlet ID example: your workspace code · Staff get their own usernames under Employees.

Phases in this book

- 1 Find RestroSuite online
- 2 Register & sign in
- 3 Workspace shell
- 4–9 Sell, floor, QR, kitchen, bills
- 10–16 Stock, menu, team, CRM, tax, reports, growth
- 17 Settings (profile, tax toggles, print, WhatsApp)
- 18–19 End of day & support

Find RestroSuite (search or APK / browser)

Goal: Find the product on phone browser or install the Android app.

Find RestroSuite (search or APK / browser) — what every control does

Why this screen exists: Find the product on phone browser or install the Android app.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Google on phone or computer.
2. Type: CodeArc RestroSuite (or restrosuite codearc).
3. Open the official result restrosuite.codearc.co.in (or CodeArc RestroSuite).

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

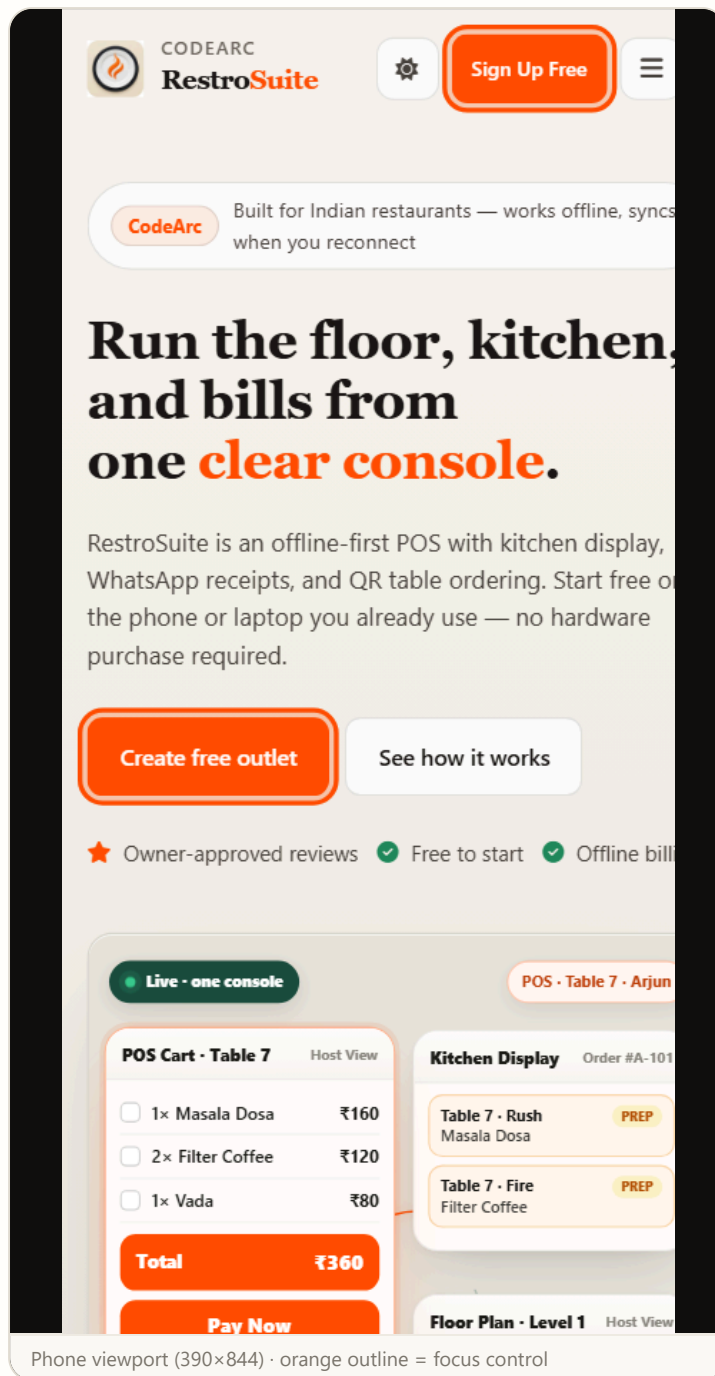

Control / button	Why it is here	What happens when you use it	Where you go next
Search box	You type the product name	Shows results for CodeArc RestroSuite	Open the official site link
Official result restrosuite.codearc.co.in	This is the real product	Opens the RestroSuite homepage	Homepage / marketing page
Sign-in result /login.html	Direct access for staff	Opens Access page	Login or Register

Tips & warnings

- Bookmark the site for staff. Prefer the official CodeArc domain.

Homepage — what RestroSuite is

Goal: Understand offline POS, WhatsApp bills, QR ordering, and free launch.

Homepage — what RestroSuite is — what every control does

Why this screen exists: Understand offline POS, WhatsApp bills, QR ordering, and free launch.

WALKTHROUGH (DO THIS IN ORDER)

1. Read the hero: offline-first restaurant POS by CodeArc.
2. Scroll Features (POS, WhatsApp, QR, CRM).
3. Note: free during launch, no credit card required.
4. Click Sign Up Free or Sign in when ready.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Sign Up Free	New outlet owners start here	Opens Register outlet flow	Registration form
Sign in	Existing outlets and staff	Opens Access → Sign in	Login form
Features section	Explains POS, WhatsApp, QR, CRM	Scrolls/marketing only	Decide to try the product
Live demo sandbox (if shown)	Try a fake bill without signup	Simulates Print & Pay	Still need real register for your outlet

Tips & warnings

- Support email for all help: support@codearc.co.in

Open the Access page (Sign in / Register)

Goal: Know the two tabs: Sign in (existing) vs Register outlet (new).

The image shows a mobile app interface for 'CODEARC RestroSuite'. At the top, there is a 'Back to overview' button and a settings icon. The main heading is 'Sign in to your workspace', followed by the instruction 'Enter your outlet ID and the credentials assigned to you.' Below this are two buttons: 'Sign in' and 'Register outlet', both highlighted with orange outlines. The 'Sign in' button is the primary focus. Underneath, there are three input fields: 'Workspace / Outlet ID' (containing 'bbb'), 'Email or Username' (containing 'bbb'), and 'Password' (masked with dots). A 'Keep me signed in' checkbox is checked, and there is a 'Forgot password?' link. A large orange 'Sign in securely' button is at the bottom. A verification message at the very bottom states 'Your outlet, role and subscription status are verified'.

Open the Access page (Sign in / Register) — what every control does

Why this screen exists: Know the two tabs: Sign in (existing) vs Register outlet (new).

WALKTHROUGH (DO THIS IN ORDER)

1. Go to <https://restrosuite.codearc.co.in/login.html>
2. See Sign in tab (left) and Register outlet tab (right).
3. New restaurants: choose Register outlet.
4. Existing staff: choose Sign in.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Sign in tab	Existing workspace	Shows login fields	Fill Outlet ID + user + password

Forgot password / Recover	Lost owner password	Opens recovery with email code	Reset password email
Theme toggle	Light/dark preference	Switches theme	Same page, new theme

Register a new outlet (step-by-step fields)

Goal: Create a workspace: business name, workspace code, owner contact, password, country & currency.

The image shows a mobile app interface for registering a new outlet. At the top, there is a 'Back to overview' button and a settings icon. Below this is the CODEARC RestroSuite logo. The main heading is 'Register your outlet', followed by the instruction 'Set up a fresh RestroSuite workspace in two quick steps.' There are two buttons: 'Sign in' and 'Register outlet'. The 'Register outlet' button is highlighted with an orange border. Below the buttons, there are two steps: '1 Outlet' and '2 Owner'. The '1 Outlet' step is highlighted with an orange circle. The 'Outlet' step contains several input fields: 'Restaurant / Business name' (with a placeholder 'e.g. Royal Restaurant & Dhaba'), 'Workspace code' (with a placeholder 'royal-dhaba'), 'Outlet address' (with a placeholder 'Shop no., street, city, PIN'), 'Business Country' (with a dropdown menu showing 'India'), and 'Currency' (with a dropdown menu). An orange outline highlights the 'Outlet' step and its fields. At the bottom, there is a note: 'Phone viewport (390×844) · orange outline = focus control'.

Phone viewport (390×844) · orange outline = focus control

Register a new outlet (step-by-step fields) — what every control does

Why this screen exists: Create a workspace: business name, workspace code, owner contact, password, country & currency.

WALKTHROUGH (DO THIS IN ORDER)

1. Click Register outlet.
2. Enter restaurant / business display name.
3. Choose a short workspace code (Outlet ID) — e.g. royal-dhaba (letters, numbers, hyphens). This is NOT the display name.
4. Enter owner WhatsApp / phone and email.
5. Pick country and currency (drives tax label and ₹ / € etc.).
6. Create a strong password (10+ characters) and confirm it.
7. Complete any OTP / verification step if shown.
8. Submit Create my outlet — wait for success, then sign in with the new Outlet ID.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Business / restaurant name	Shown on bills and UI	Stores display name	Still need workspace code
Workspace code (Outlet ID)	Unique login slug staff type every day	Creates saas tenant slug	Must remember this code
Country + currency	Tax system and ₹/€ symbols	Seeds defaults	Tax label GST/VAT etc.
Owner phone / email	Recovery and support contact	Saves on tenant	OTP if enabled
Password + confirm	Owner security	Hashes password	Create outlet → then Sign in
Create my outlet	Submit registration	Provisions cloud workspace	Sign in with new Outlet ID

Tips & warnings

- Write down Outlet ID + username + password for the owner.
- Staff later get separate logins under Employees — do not share owner password on the floor.

Sign in to an existing outlet

Goal: Log in with Outlet ID, username, and password.

 Your outlet, role and subscription status are verified

Phone viewport (390×844) · orange outline = focus control

Sign in to an existing outlet — what every control does

Why this screen exists: Log in with Outlet ID, username, and password.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Sign in tab.
2. Workspace / Outlet ID: e.g. bbb (the code from registration).
3. Email or Username: staff or owner username.
4. Password: your password.
5. Optional: Keep me signed in (for trusted devices only).
6. Click Sign in securely → lands on Point of Sale.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

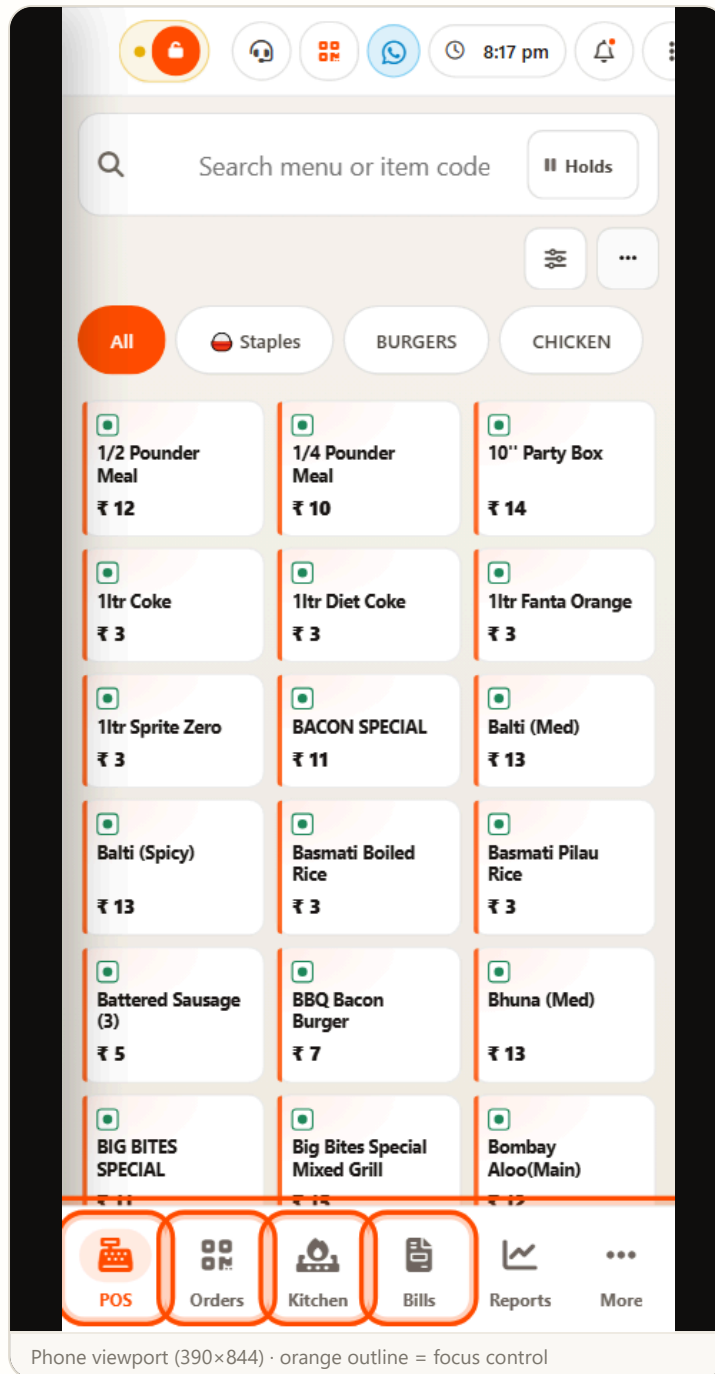

Control / button	Why it is here	What happens when you use it	Where you go next
Workspace / Outlet ID	Which restaurant database	Scopes the login	Must match registration code
Username	Which staff account	Loads role + allowed tabs	Owner vs cashier see different menus
Password	Prove identity	Validates credentials	Session token stored
Keep me signed in	Trusted device only	Remember-me blob in browser	Next visit skips retype
Sign in securely	Enter the console	Redirects to dashboard POS	Point of Sale screen

Tips & warnings

- Wrong outlet ID is the most common error — use the code, not the restaurant name.
- Forgot password: use Recover access on this page.

After login — mobile layout

Goal: Know where the bottom bar, top tools, and cart live on phone.

After login — mobile layout — what every control does

Why this screen exists: Know where the bottom bar, top tools, and cart live on phone.

WALKTHROUGH (DO THIS IN ORDER)

1. Bottom bar: POS · Orders · Kitchen · Bills · Reports · More.
2. Main area: the active module (starts on POS after login).
3. Top bar: lock/station, search tools, WhatsApp, time, notifications.
4. On POS: orange CHECKOUT bar appears when the cart has items.
5. Everything else (Floor, Menu, Inventory, Settings...) is under More.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

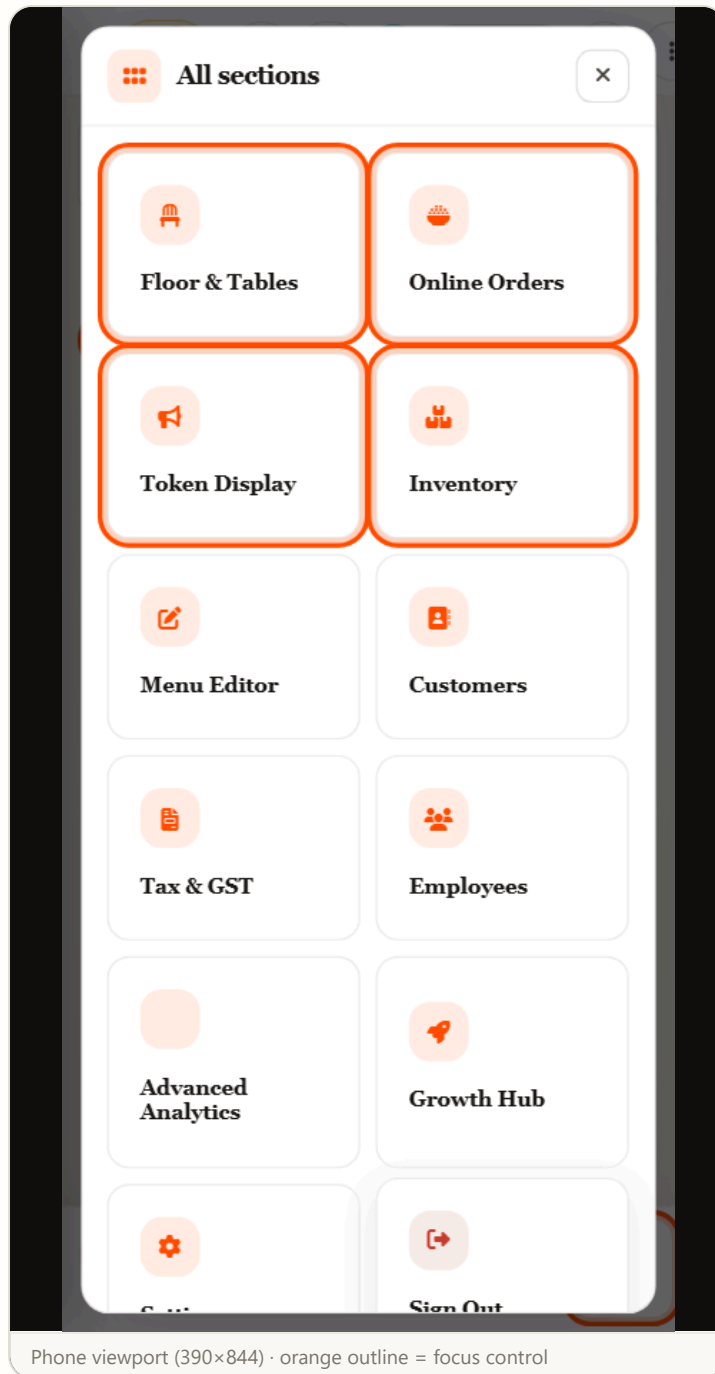

Control / button	Why it is here	What happens when you use it	Where you go next
Left sidebar links	Jump between modules	Opens that tab in main area	POS / Kitchen / Bills...
Top bar Shift	Cash session for the day	Open/close shift modals	Z-report on close
Top bar WhatsApp icon	Bill send status	Green=connected / red=off	Settings → WhatsApp to fix
Version chip	Support needs build id	Click copies full version	Paste in support email
Settings (gear)	Outlet configuration	Opens Settings tab	Profile / Tax / Printers...
Help	Setup tour and checklist	Opens product guide / demo steps	Guided tour
Sign out	Leave secure session	Clears session	Login page

Tips & warnings

- Orange version chip (e.g. v209) — long-press/copy full build id for support.

More menu — every other module

Goal: Open All sections and jump to Floor, Menu, Inventory, Settings...

More menu — every other module — what every control does

Why this screen exists: Open All sections and jump to Floor, Menu, Inventory, Settings...

WALKTHROUGH (DO THIS IN ORDER)

1. Tap More (...) on the bottom bar.
2. All sections grid opens: Floor & Tables, Online Orders, Inventory, Menu Editor, Customers, Tax & GST, Employees, Analytics, Growth Hub, Settings, Sign out.
3. Customers, Tax & GST, Employees, Analytics, Growth Hub, Settings, Sign out.
4. Tap a tile to open that module; bottom bar stays for POS / Orders / Kitchen / Bills / Reports.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

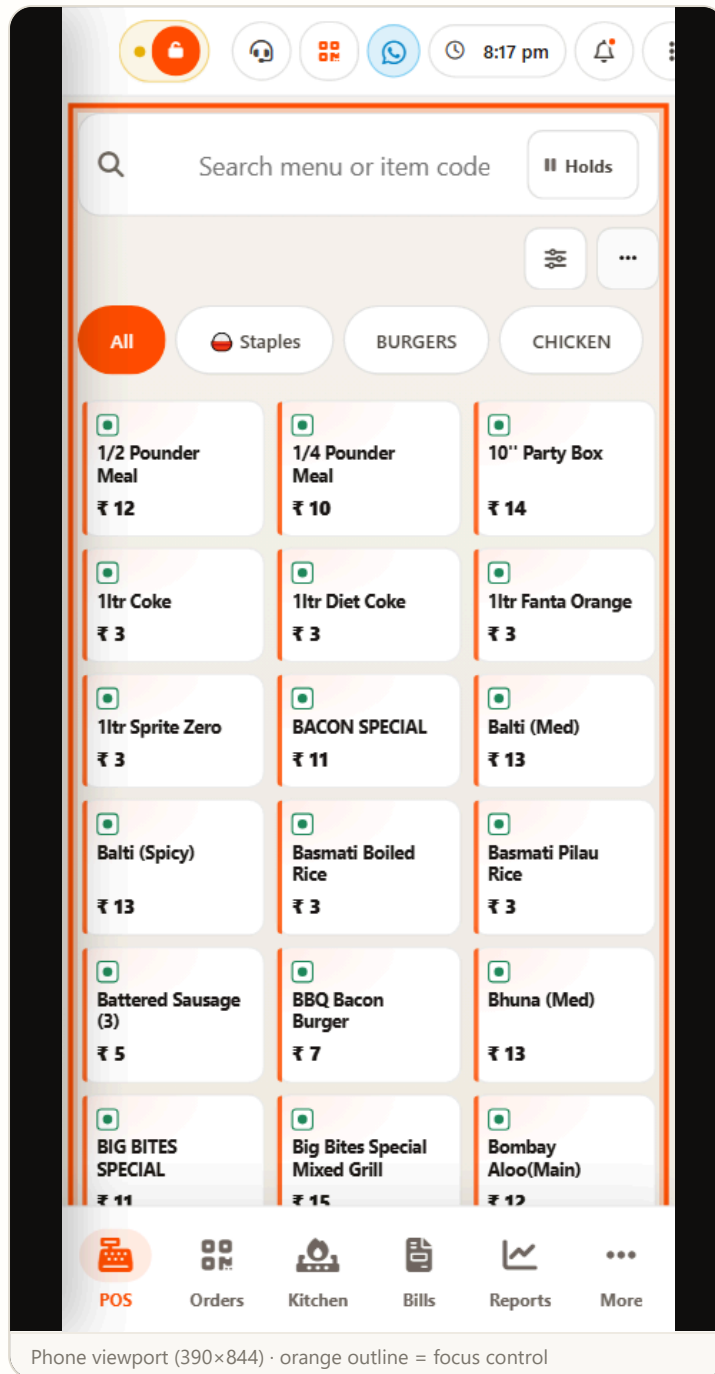

Control / button	Why it is here	What happens when you use it	Where you go next
Point of Sale	Sell and bill	Opens POS	Cart + menu
QR Orders	Guest self-orders waiting	Opens accept/reject queue	Kitchen after accept
Kitchen	Cook screen	Opens KDS	Mark ready
Floor & Tables	Dining room map	Opens table grid	Seat / hold / QR print
Online Orders	Delivery channels	Opens online queue	Accept/reject
Bills	History & reprint	Opens bills list	Search / export / refund
Inventory	Stock control	Opens stock	Add items / low stock
Menu Editor	Prices & GST slabs	Opens catalog	Add/edit items
Employees	Staff logins	Opens staff list	Add role-limited users
Customers	CRM & dues	Opens customer cards	Settle dues / notes
Tax & GST	Compliance view	Opens tax workspace	Exports for CA
Reports	Sales KPIs	Opens sales reports	CSV / GSTR download
Analytics	Trends	Opens analytics	Peak hours / top items
Growth Hub	Extra ops tools	Opens tile launcher	Reservations, POs, offers...

Tips & warnings

- Your role may hide some tiles — that is normal for cashiers vs owners.

POS screen — menu grid + cart

Goal: Sell takeaway, dine-in, or delivery from one counter screen.

POS screen — menu grid + cart — what every control does

Why this screen exists: Sell takeaway, dine-in, or delivery from one counter screen.

WALKTHROUGH (DO THIS IN ORDER)

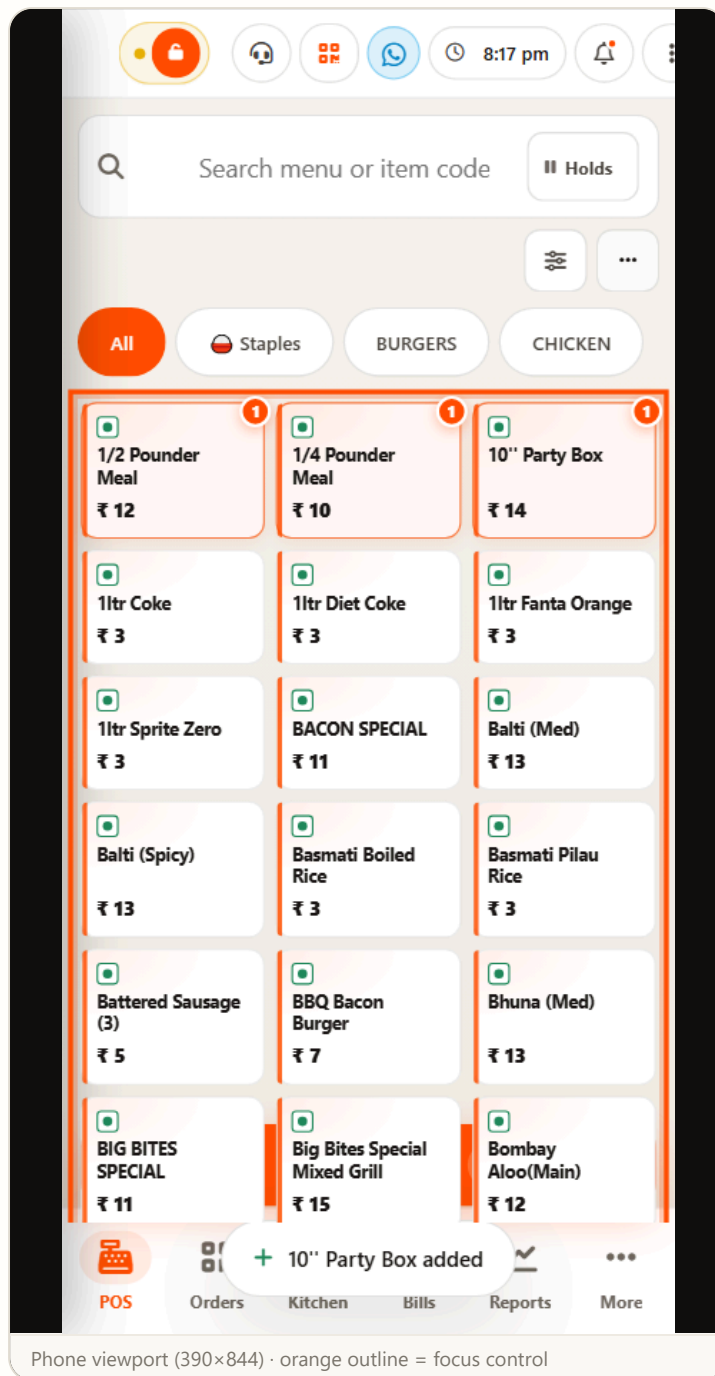

1. Open Point of Sale from the sidebar (default after login).
2. Left/centre: menu categories and item tiles.
3. Right (or bottom on mobile): Current Order cart.
4. Top of cart: order type Takeaway · Dine-in · Delivery.
5. Search box filters menu; sort and size controls adjust the grid.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Search menu box	Find items fast in rush	Filters tiles by name/code	Fewer tiles shown
Sort & card size (sliders)	Comfortable grid	Changes sort and tile size	Same menu, new layout
Category chips	Browse by section	Filters by category	Only that category items
Menu item tile	Add to bill	Adds line to cart (+1 qty)	Cart updates total
Order type icons (bag / utensils / bike)	Takeaway vs dine-in vs delivery	Sets order channel	May show table or delivery fields
Cart count pill	How many lines	Display only	—
Clear cart (trash)	Cancel whole order	Empties cart	Empty cart state

Add items to the cart

Goal: Build an order quickly during rush.

Add items to the cart — what every control does

Why this screen exists: Build an order quickly during rush.

WALKTHROUGH (DO THIS IN ORDER)

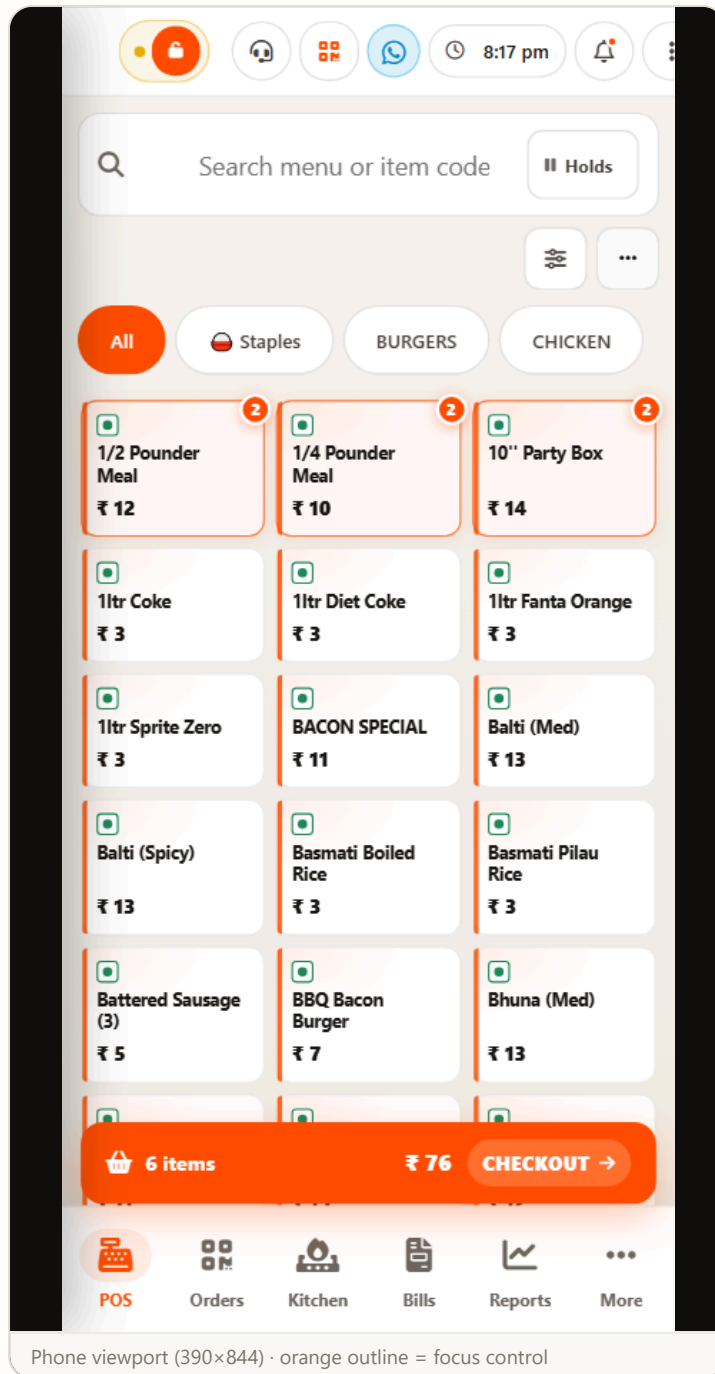

1. Tap a category (e.g. Starters) if needed.
2. Tap menu items — they appear in the cart with qty.
3. Use + / – on a line to change quantity.
4. Optional: open line note for “less spicy”, “no onion”.
5. Optional: customer name + phone (needed for WhatsApp bill and CRM).

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Item + / – qty	Change quantity	Updates line qty and totals	Tax recalculates
Line note	Kitchen instructions	Saves note on line	Shows on KOT/KDS
Add customer toggle	CRM / WhatsApp / Due	Opens name+phone fields	Customer linked to bill
Table dropdown	Dine-in table	Binds order to table	Floor shows occupied
Covers / pax	Guest count	Stores covers	Reports / floor info
Discount controls (if shown)	Promo or manager disc	Reduces subtotal	Tax on net

Choose payment and settle (Print & Pay)

Goal: Collect money and finish the bill.

Choose payment and settle (Print & Pay) — what every control does

Why this screen exists: Collect money and finish the bill.

WALKTHROUGH (DO THIS IN ORDER)

1. With items in cart, tap orange CHECKOUT on the bottom of POS.
2. Review cart lines, subtotal, tax, grand total.
3. Select payment: Cash, UPI, Card, Split, or Due (credit — needs customer).
4. Tap Print & Pay to settle.
5. On Bill settled: Print thermal, WhatsApp PDF, or close.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

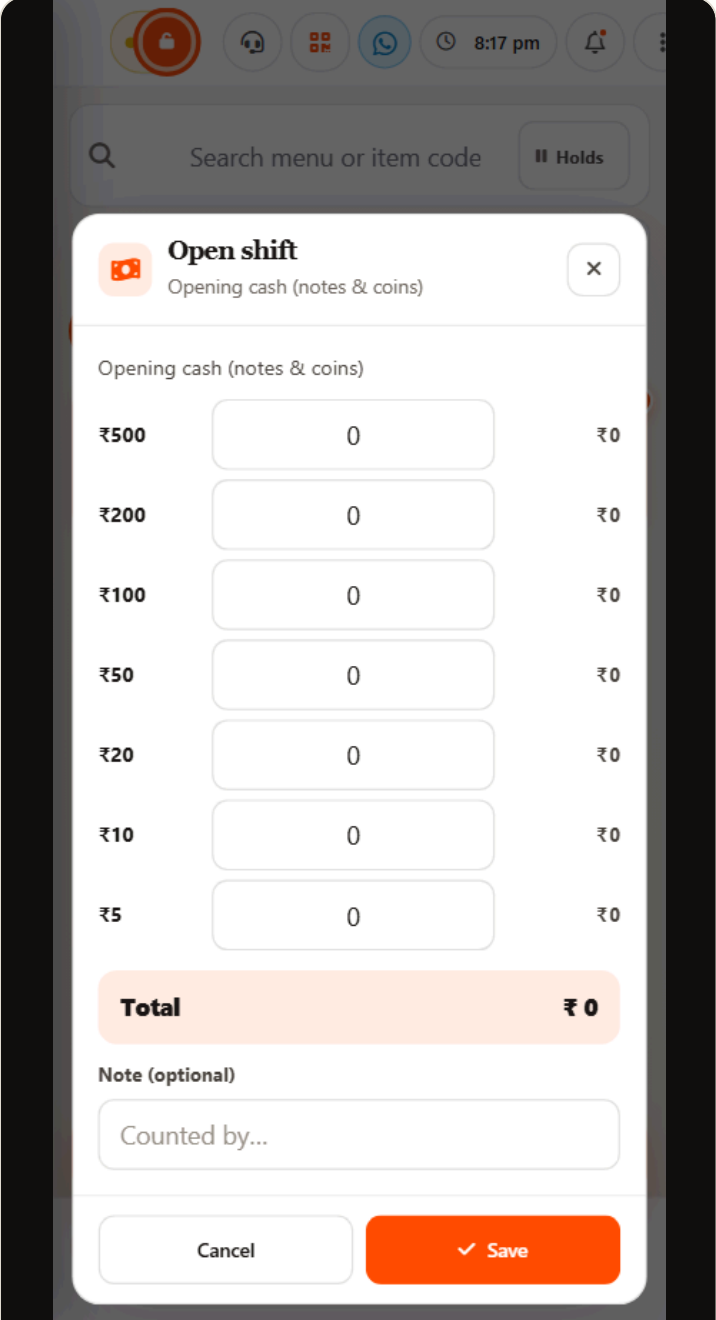

Control / button	Why it is here	What happens when you use it	Where you go next
Cash	Cash tender	Selects cash payment	May open cash received UI
UPI	UPI / QR pay	Selects UPI	Settle with UPI
Card	Card machine	Selects card	Settle
Split	Multi tender	Opens split amounts	Partial cash+UPI etc.
Due	Credit sale	Requires customer	Adds to customer dues
Print & Pay	Finish sale	Creates paid bill, inventory, KDS	Bill settled modal
WhatsApp on settle	Send PDF bill	Queues WhatsApp send	Customer phone receives bill
Thermal / Print	Paper receipt	Prints ESC/POS or browser print	Physical receipt

Tips & warnings

- Due payment requires a registered customer — use Customers / quick register.

Open / close shift (cash discipline)

Goal: Start and end the day with a clear cash float and Z-report.

Open shift ×

Opening cash (notes & coins)

₹500	0	₹0
₹200	0	₹0
₹100	0	₹0
₹50	0	₹0
₹20	0	₹0
₹10	0	₹0
₹5	0	₹0
Total		₹ 0

Note (optional)

Phone viewport (390×844) · orange outline = focus control

Open / close shift (cash discipline) — what every control does

Why this screen exists: Start and end the day with a clear cash float and Z-report.

WALKTHROUGH (DO THIS IN ORDER)

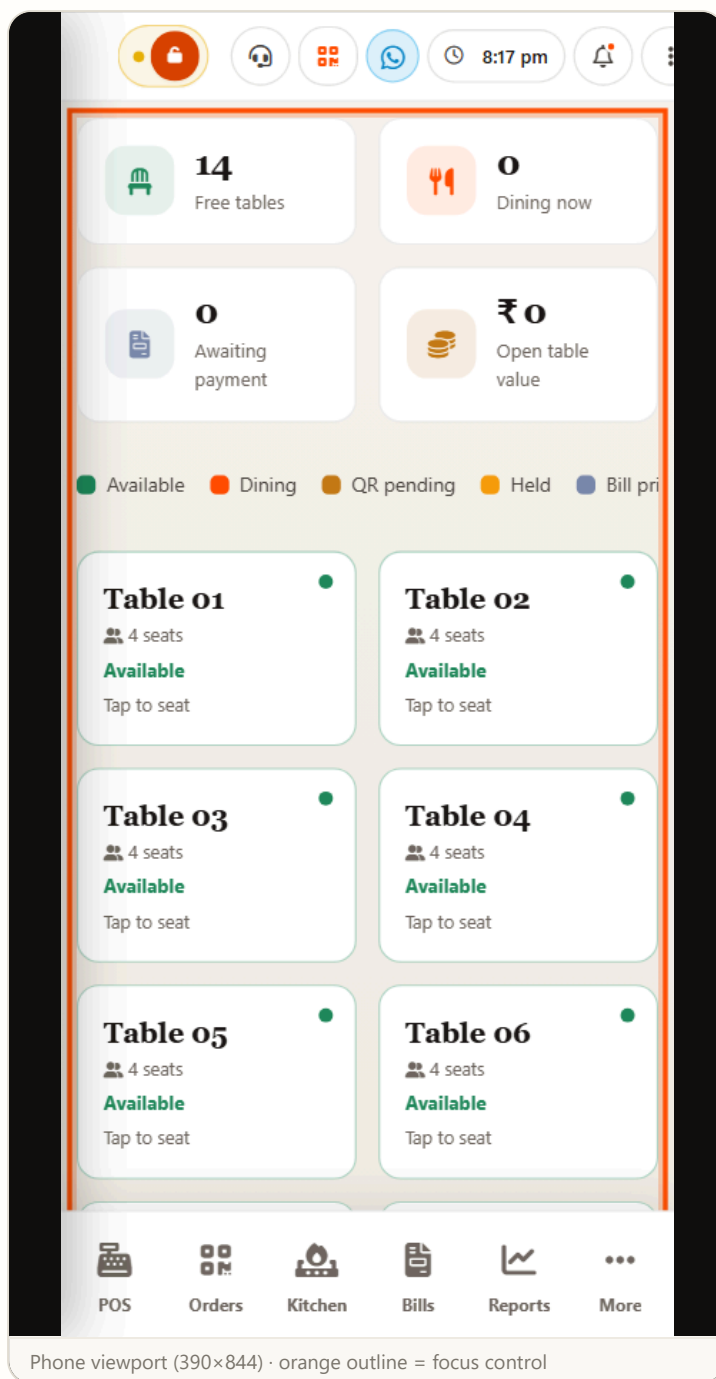

1. Find Shift control in the top bar (Open shift / Close shift).
2. Open shift: enter opening cash (notes & coins).
3. Sell all day on this station.
4. Close shift: enter counted cash → see variance → Print / CSV Z-report.
5. Use station label (e.g. Counter 1) when multiple devices bill.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Open shift	Start cash session	Records float	Bills tag this shift
Close shift	End cash session	Asks counted cash	Z-report variance
Preview Z	Check before close	Shows expected cash	Still open shift
Station label	Multi-counter identity	Renames station	Reports filter by station

Floor & Tables — seating map

Goal: See free / dining / held / QR tables at a glance.

Floor & Tables — seating map — what every control does

Why this screen exists: See free / dining / held / QR tables at a glance.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Floor & Tables.
2. Colours show state: free, seated, dining, held, QR pending, billed.
3. Tap a free table → Seat & order → sends you to POS for that table.
4. Held tables: Resume hold on POS.
5. Transfer moves open tickets to another free table.
6. Clear / free table when guests leave (confirm carefully).

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Table card (free)	Seat guests	Seat & order / open actions	POS with that table
Table card (occupied)	Work open check	Checkout / transfer / print	POS cart or free table
Hold	Pause order	Saves draft	Held state on floor
Transfer	Move guests	Moves tickets to free table	Old free, new occupied
Clear / free	Turn table	Removes open tickets (confirm)	Table free
Edit tables / Save layout	Change floor plan	Add/remove tables to cloud	New map for all stations

Print Table QR tents

Goal: Put scannable Order food + Call waiter cards on each table.

Print Table QR tents — what every control does

Why this screen exists: Put scannable Order food + Call waiter cards on each table.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Floor & Tables from More.
2. On Floor toolbar: Print Table QRs (or View QR on one table).
3. Choose card size (Mini → Full) or Custom mm sizes.
4. Toggle Wi-Fi, welcome line, Powered by (set Wi-Fi under Settings first).
5. Live preview updates as you change options. Print at 100% scale.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

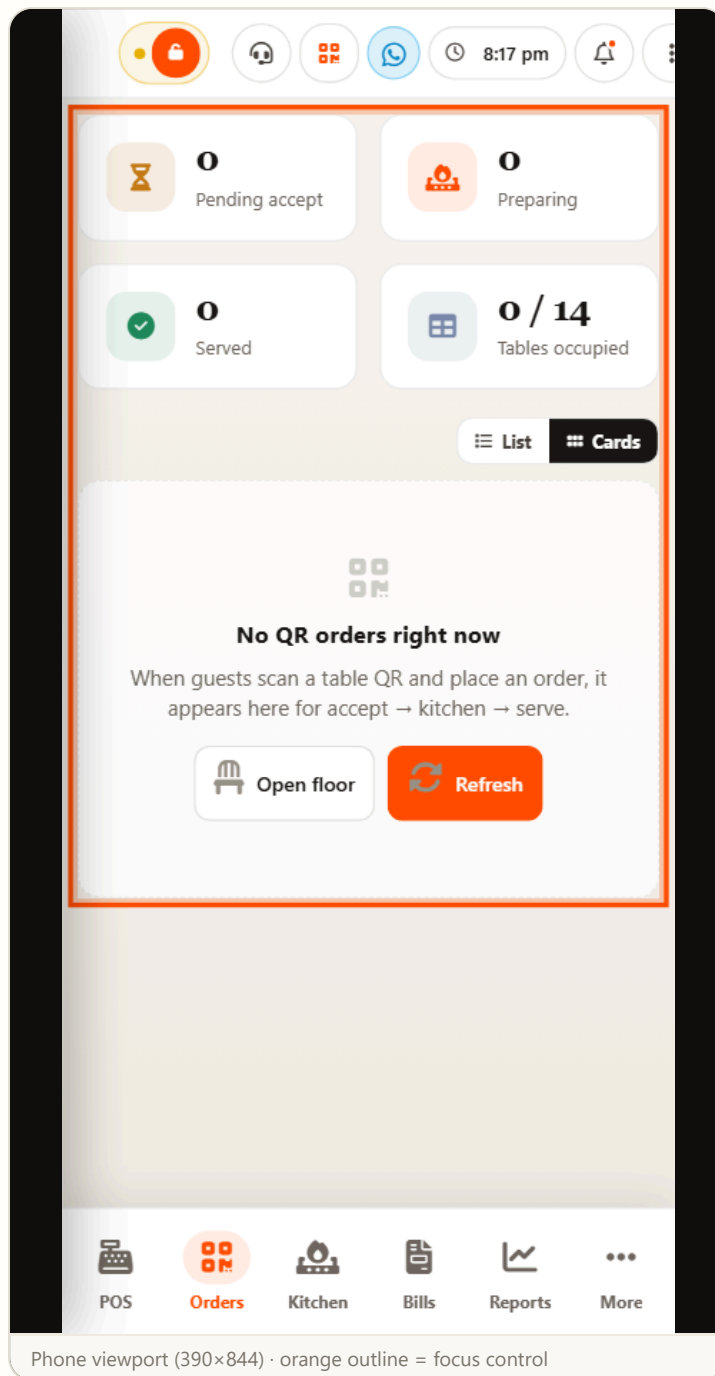

Control / button	Why it is here	What happens when you use it	Where you go next
Print Table QRs	Mass print tents	Opens size + preview modal	Browser print sheet
Size presets	Fit table space	Rebuilds card layout	Preview updates
Toggles (Wi-Fi, steps...)	What guests see	Shows/hides card lines	Print reflects toggles
Open all QR / Close all	Bulk session control	Opens/closes guest QR per table	Guests can/cannot order

Tips & warnings

- Table number is always on the card — required for guest orders.

QR Orders queue (staff)

Goal: Accept or reject orders guests place from table QR.

QR Orders queue (staff) — what every control does

Why this screen exists: Accept or reject orders guests place from table QR.

WALKTHROUGH (DO THIS IN ORDER)

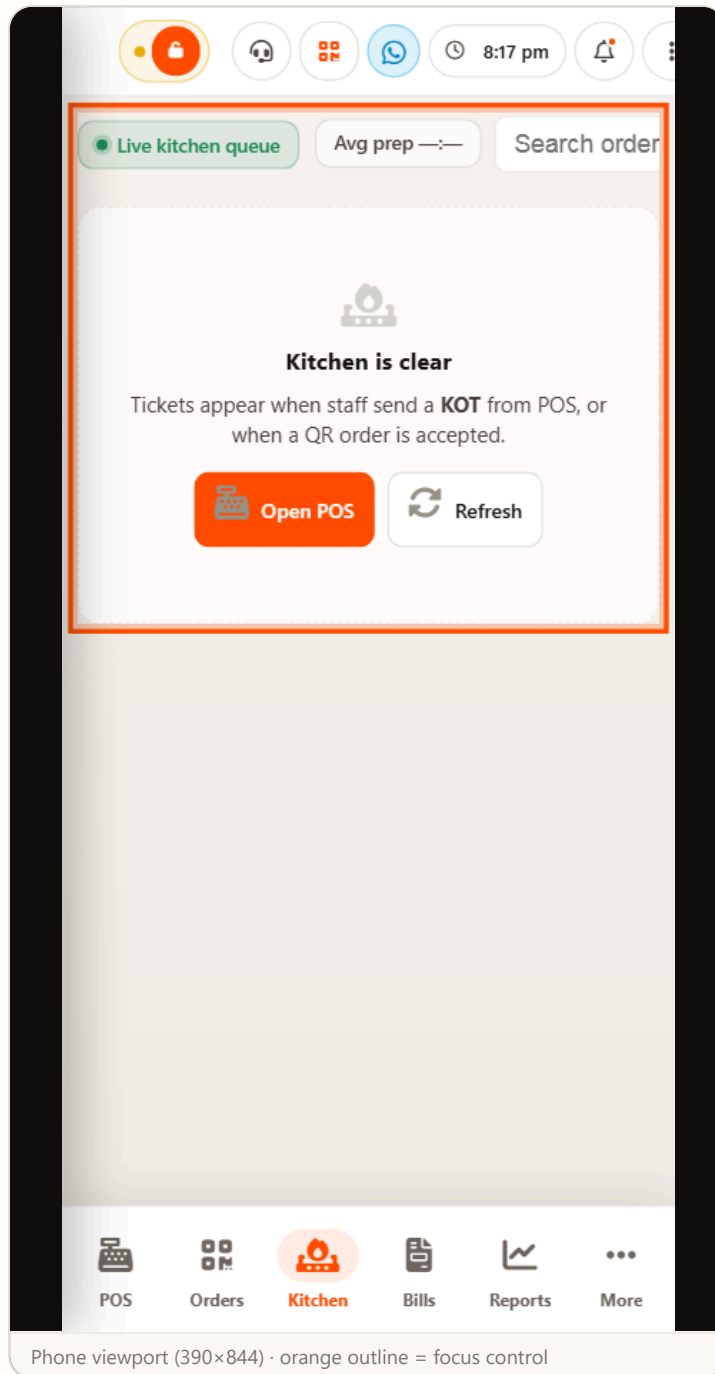

1. Open QR Orders from the sidebar.
2. New guest tickets appear with table number and items.
3. Accept → kitchen / KDS gets the ticket.
4. Reject if needed (wrong table / test).
5. Amend shared table orders before kitchen starts prep (when enabled).

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Accept	Send to kitchen	Confirms guest order	KDS ticket
Reject	Wrong/test order	Drops ticket	Guest may reorder
Amend (if shown)	Change before prep	Edits shared table order	Updated kitchen lines

Kitchen Display (KDS)

Goal: Cooks see tickets and mark items ready without paper KOTs.

Kitchen Display (KDS) — what every control does

Why this screen exists: Cooks see tickets and mark items ready without paper KOTs.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Kitchen from the sidebar (or kds.html on a kitchen tablet).
2. Tickets show table / token, items, and status.
3. Mark preparing → ready as food is cooked.
4. Clear when plated or handed to service.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

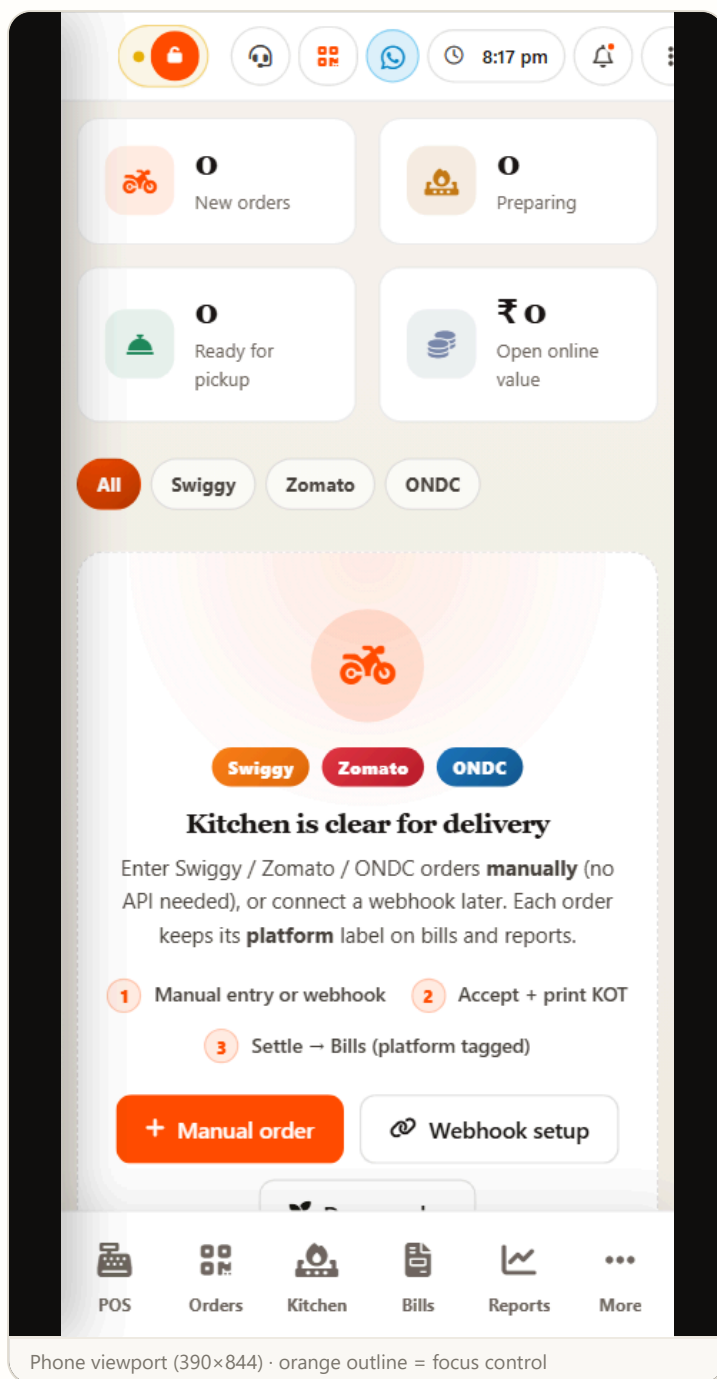

Control / button	Why it is here	What happens when you use it	Where you go next
Ticket card	One order for cooks	Shows items + table/token	Tap to progress status
Mark ready / done	Food finished	Advances status	Service/pickup
Clear	Remove from board	Removes finished ticket	Cleaner KDS

Tips & warnings

- Use a bright tablet in landscape, fixed on the pass.

Online Orders queue

Goal: One place for delivery-channel and manual online tickets.

Online Orders queue — what every control does

Why this screen exists: One place for delivery-channel and manual online tickets.

WALKTHROUGH (DO THIS IN ORDER)

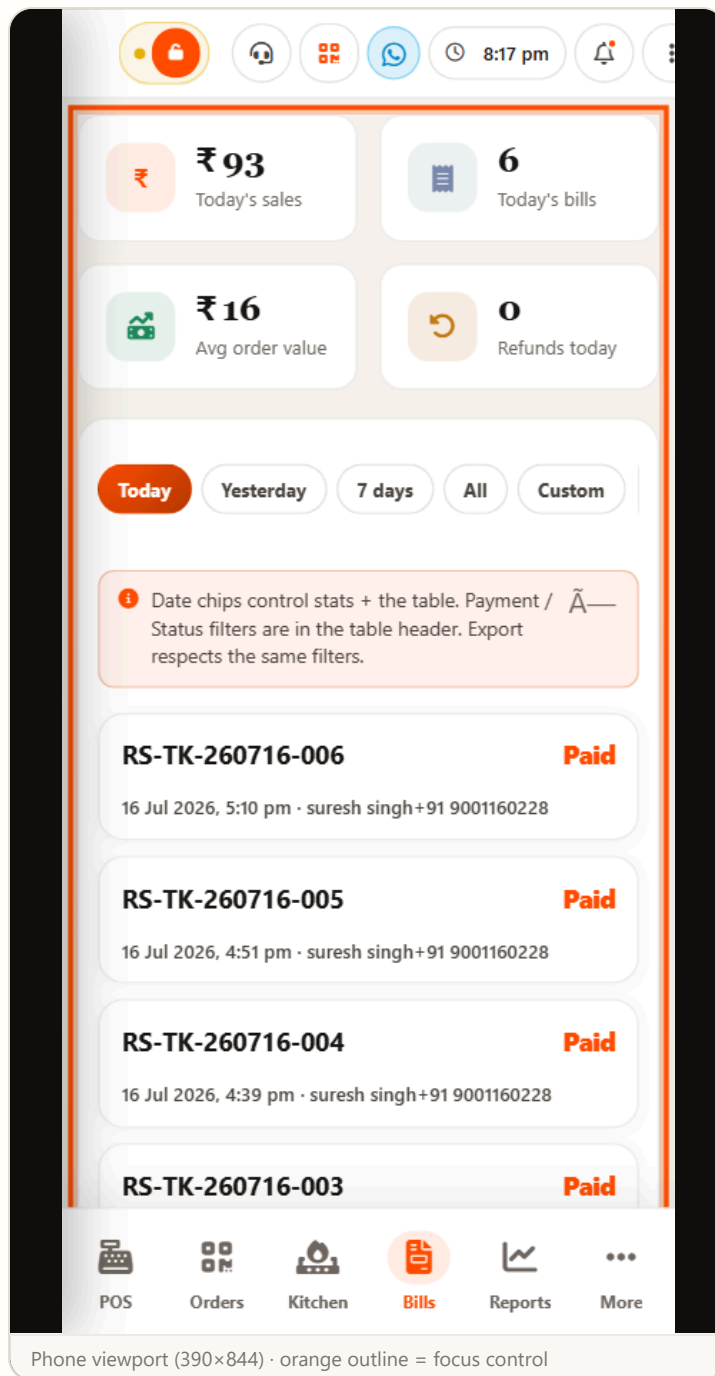

1. Open Online Orders.
2. Review items and customer details.
3. Accept (to kitchen) or Reject.
4. Phone orders: create manual online order, then process like POS.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Accept order	Take delivery job	Routes to kitchen/billing	KDS / active order
Reject	Cannot fulfil	Declines ticket	Channel notified if linked
Manual online entry	Phone order	Creates online ticket	Same accept flow

Bills — search, reprint, export

Goal: Find any settled invoice and hand data to accounts.

Bills — search, reprint, export — what every control does

Why this screen exists: Find any settled invoice and hand data to accounts.

WALKTHROUGH (DO THIS IN ORDER)

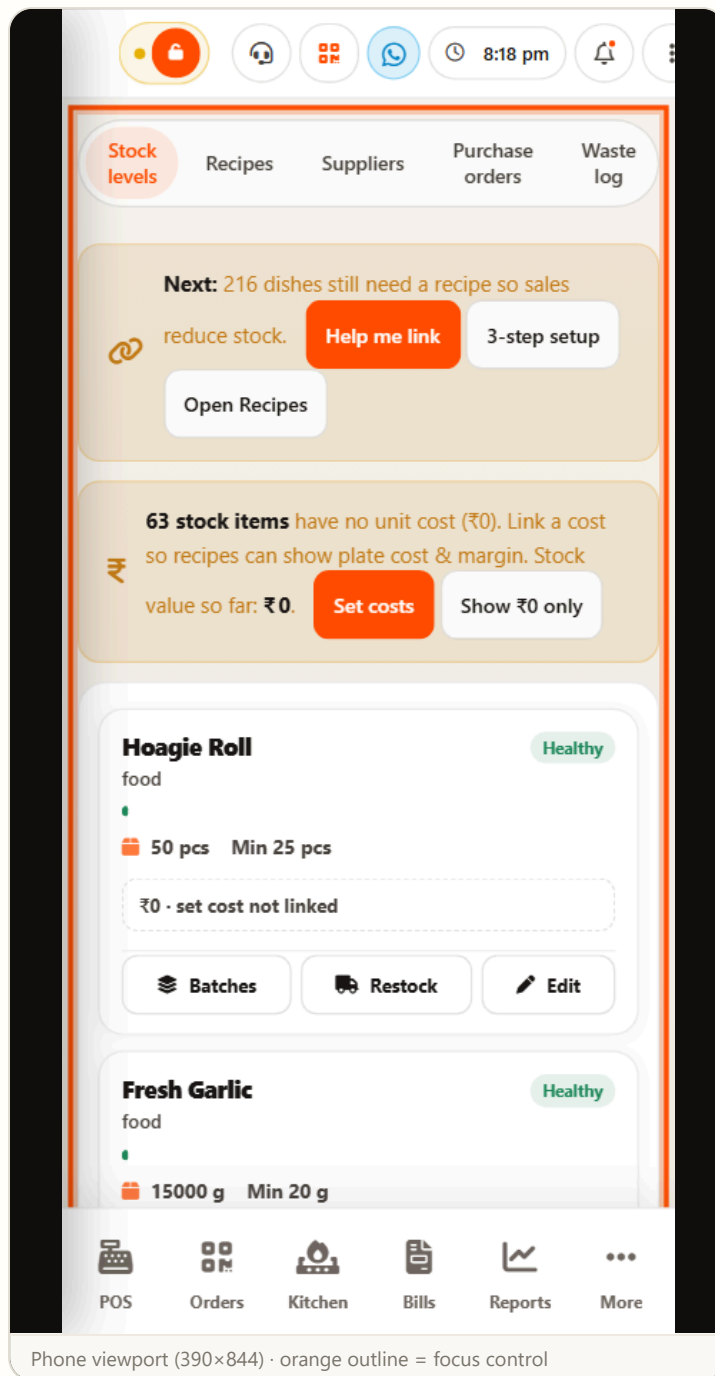

1. Open Bills.
2. Search by bill no, phone, or customer name.
3. Open a row: totals, tax, payment method, station.
4. Reprint receipt / thermal.
5. Refund / void only with manager PIN if configured.
6. Export CSV for the day or filtered set.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Search box	Find old bill	Filters by no/phone/name	Matching rows
Bill row	Inspect invoice	Opens detail	Reprint / refund actions
Reprint	Lost paper	Prints again	Same receipt
Refund/void	Correct mistakes	PIN gate then void	Status refunded
Export CSV	Accountant handoff	Downloads file	Excel / CA tools

Inventory — stock list

Goal: Track ingredients, low stock, and recipe use.

Inventory — stock list — what every control does

Why this screen exists: Track ingredients, low stock, and recipe use.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Inventory.
2. Add stock items: name, unit, qty, reorder threshold.
3. Or import from a simple sheet when available.
4. Link recipes on Menu Editor so sales deduct stock.
5. Watch low-stock badges before weekend rush.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Add stock	New ingredient	Opens add modal	Row in stock list
Qty / reorder fields	Track levels	Saves thresholds	Low stock alerts
Import (if shown)	Bulk load	Reads sheet	Many rows at once

Menu Editor — items, prices, GST slab

Goal: Publish what POS and guest QR both sell.

Menu · Recipe · Stock

216 dishes not linked yet — selling them will not reduce stock.

0%

POS Orders Kitchen Bills Reports More

Phone viewport (390×844) · orange outline = focus control

Menu Editor — items, prices, GST slab — what every control does

Why this screen exists: Publish what POS and guest QR both sell.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Menu Editor.
2. Create categories (Starters, Mains, Drinks...).
3. Add item: name, price, veg/non-veg, GST slab (5% / 12% / 18%...).
4. Optional: recipe link for inventory, addons, Hindi name.
5. Save — item appears on POS after refresh/sync.
6. Mark sold-out when kitchen is out of stock.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

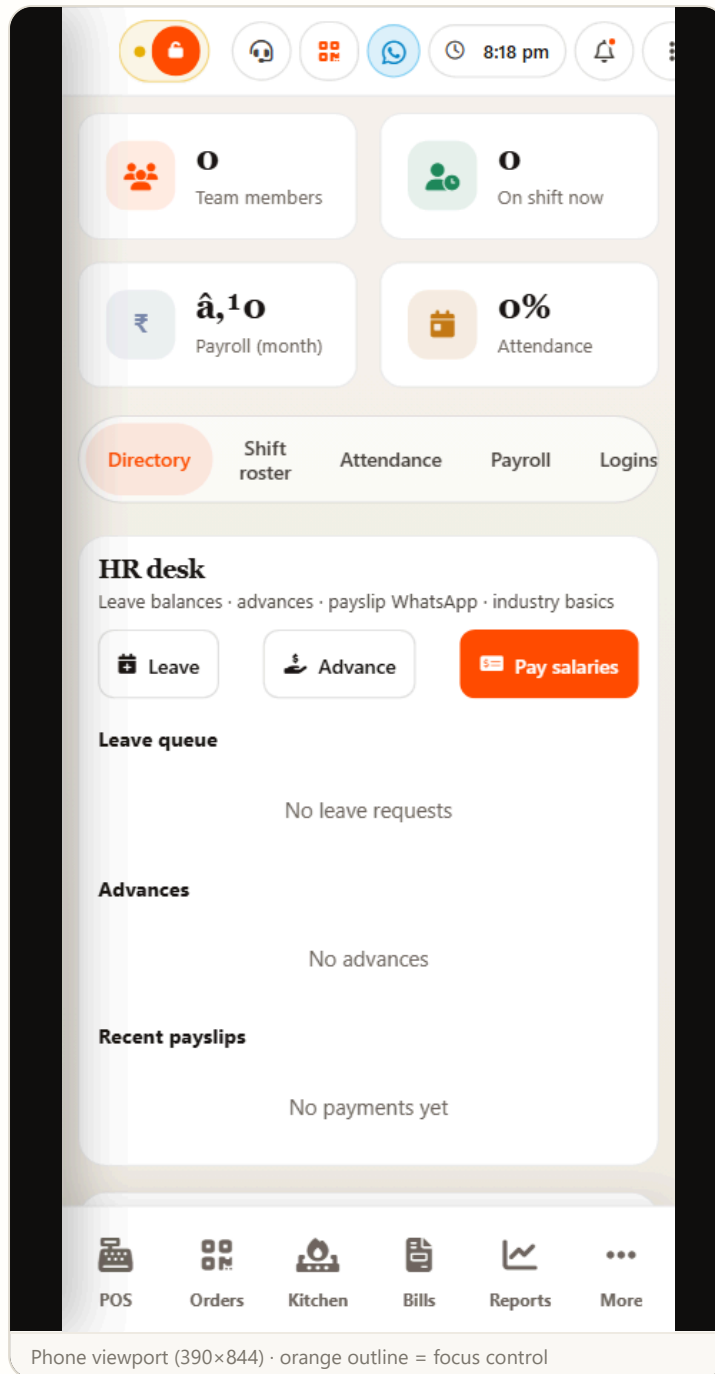

Control / button	Why it is here	What happens when you use it	Where you go next
Add item	Sell something new	Opens editor form	Name price GST save
GST slab dropdown	Correct tax per dish	Sets taxCategory	POS tax uses this
Category	POS navigation	Groups tiles	Category chips
Recipe link	Auto stock deduct	Binds ingredients	Inventory drops on sale
Save	Publish	Writes menu	Visible on POS/QR

Tips & warnings

- India: most restaurant food 5%; some packaged drinks higher — ask your CA.

Employees — roles and logins

Goal: Give each staff member their own login and limited tabs.

Employees — roles and logins — what every control does

Why this screen exists: Give each staff member their own login and limited tabs.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Employees.
2. Add staff: name, username, password, role (cashier, waiter, kitchen, manager...).
3. Limit tabs for cashiers (e.g. POS + Bills only).
4. Test login once as that user.
5. Deactivate login when someone leaves.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

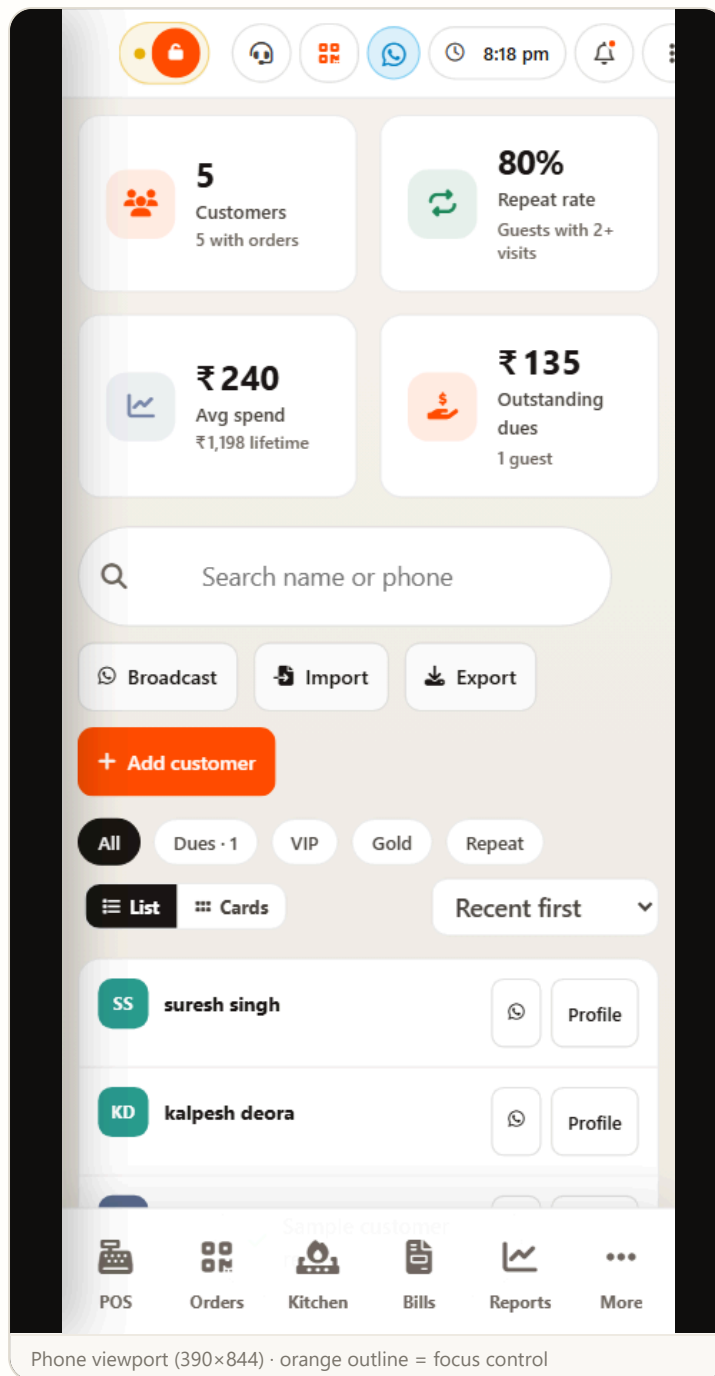

Control / button	Why it is here	What happens when you use it	Where you go next
Add employee	New staff login	Creates user	They can sign in
Role selector	Limit power	Sets allowed tabs	Cashier sees fewer modules
Deactivate	Ex-staff	Blocks login	Cannot sign in

Tips & warnings

- Never share the owner password on the counter tablet.

Customers — CRM, loyalty, dues

Goal: Know regulars, points, and outstanding credit.

Customers — CRM, loyalty, dues — what every control does

Why this screen exists: Know regulars, points, and outstanding credit.

WALKTHROUGH (DO THIS IN ORDER)

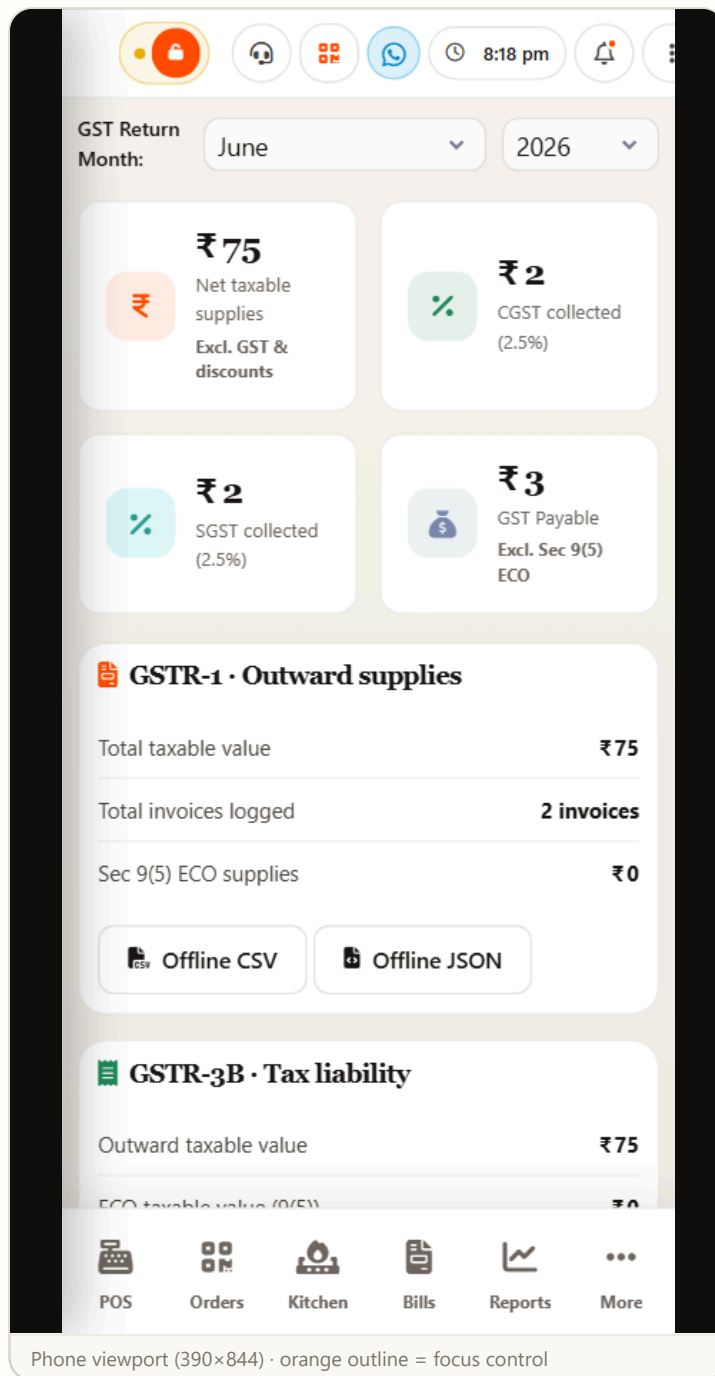

1. Open Customers.
2. Profiles build automatically when you bill with a phone number.
3. Open a card: visits, spend, loyalty, notes, dues badge.
4. Settle Dues: Cash / UPI / Card → receipt / WhatsApp.
5. Use Due payment on POS only with a selected customer.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Customer card	Open profile	Shows history/dues	Settle or note
Settle dues	Collect credit	Payment modal	Dues reduce + receipt
Search customers	Find phone/name	Filters grid	Matching cards

Tax & GST workspace

Goal: See GST collected and export accountant packs.

Tax & GST workspace — what every control does

Why this screen exists: See GST collected and export accountant packs.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Tax & GST.
2. Review period stats (taxable supplies, CGST/SGST style totals).
3. Download GSTR / period exports for your CA.
4. Manage rate slabs if offered (country tax packs).

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

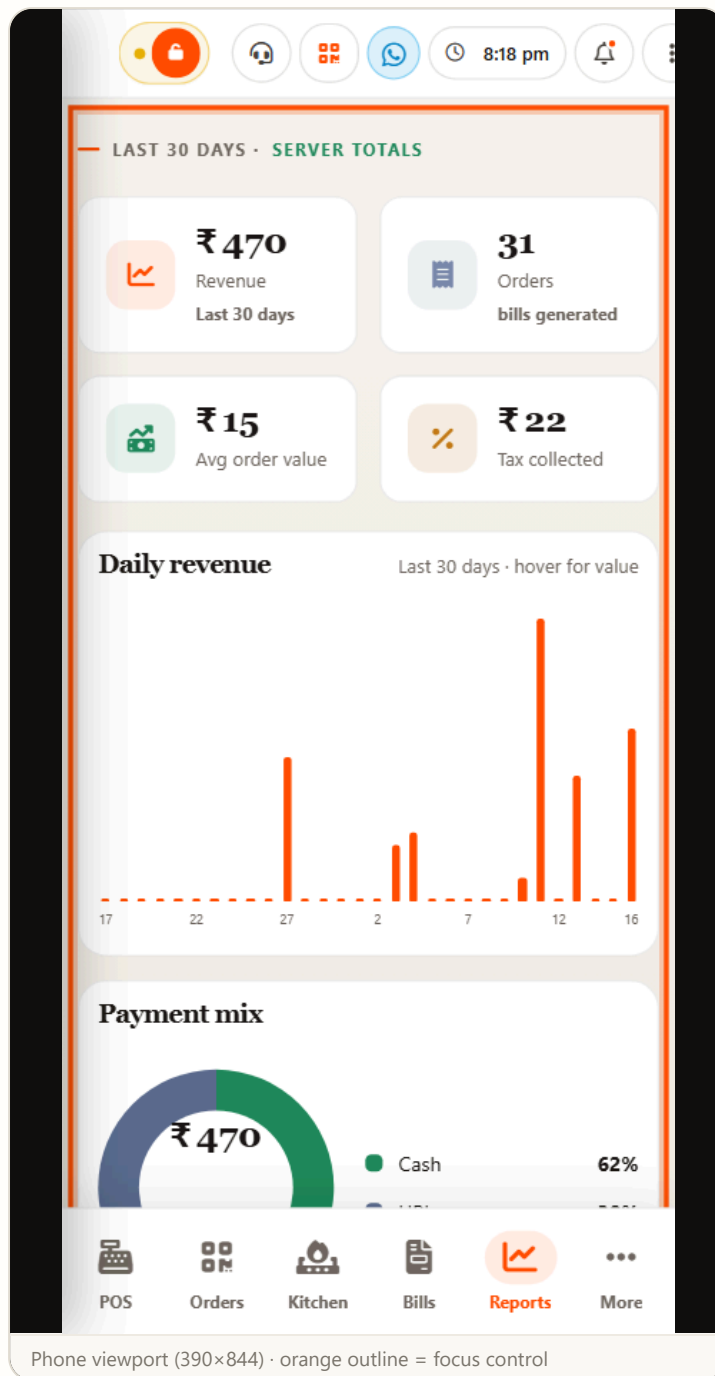

Control / button	Why it is here	What happens when you use it	Where you go next
Period selectors	Month for return	Filters stats	Updated totals
GSTR / CSV / PDF buttons	CA pack	Downloads file	File for accountant
Rate slabs editor	Country rates	Edits tax_rates	ResolveRate uses them

Tips & warnings

- Per-item GST is set in Menu Editor; outlet toggles are in Settings → Taxes.

Sales Reports

Goal: See revenue, orders, payment mix, tax for Today / 30 days.

Sales Reports — what every control does

Why this screen exists: See revenue, orders, payment mix, tax for Today / 30 days.

WALKTHROUGH (DO THIS IN ORDER)

1. Open Reports.
2. Pick period: Today, This week, This month, Last 30 / 90 days.
3. Read KPI cards: Revenue, Orders, AOV, Tax collected.
4. Daily revenue bars and Payment mix donut.
5. Top categories + Tax summary.
6. Download GSTR-ready CSV for the accountant.

CONTROL REFERENCE — BUTTON · WHY · WHAT IT DOES · NEXT SCREEN

Control / button	Why it is here	What happens when you use it	Where you go next
Today / Week / Month / 30 / 90	Time range	Recomputes KPIs	New charts
